4 March 1969

MEMORANDUM FOR: Chief, Technical Services and Support Group, NPIC

SUBJECT: [ ] Processor

25X1

1. Attached are reports [ ] regarding the [ ] Processor.

25X1

25X1

2. It is our concerted opinion in PSG that the [ ] Processor should not be installed in the NPIC Photo Lab, in that this prototype will not enhance the Center's operational capabilities and, even on a make-shift basis for testing, it is estimated it will cost [ ] to prepare the site. It, furthermore, will cost manpower to operate this equipment in the test mode and will be extremely disruptive to our production efforts.

25X1

25X1

3. It should be noted that the Chiefs of PSD and the Operations Staff (of our former organization) argued against this R&D project at its inception, indicating that this processor was exclusively designed for processing original negatives, which are not NPIC's responsibility.

25X1

25X1

4. There is no basic justification for PSG to install [ ] [ ] Therefore, it is strongly recommended that arrangements be made [ ] for testing purposes.

25X1

25X1

25X1

25X1

5. Unless advised to the contrary I will assume that no further move will be taken by TSSG to install [ ] in the PSG Photo Lab.

Comments:

are involved in any decision in this matter. ESD's plans to date are based on DED's requirements for test data and JCSG's willingness to support the tests with facilities and manpower. These memos clearly change this base and ESD will be prepared to address changes in plans at your convenience.

See attached note

lets talk

ASAP.
